Thank you for purchasing SmartDel software. This document will help you understand functionalities of this Software.

#### Purpose:

SmartDel software is developed to analyse "Delivery trends" of stocks traded at BSE/NSE Cash market. It also helps to understand the delivery impact on the stock, how the delivery affects the prices. Also you get Volume, Price, % delivery to volume data for both the exchange.

#### Advantages:

- The software can scan the entire market in a flash.
- You can run any of 55+ queries for either entire market or for your desired sector or portfolio [Data of 100+ sectors, 30+ indices ]
- You can select the exchange [only NSE/only BSE/Both combined].
- Advanced Filter Options
- Result output can be exported to Excel

Press <Enter> to get it started.

### Data Updation

You can do End-Of-Day data updation from this option. Select the date & click on Download from SmartDel.com button. If you are connected to the internet it will download & process the data from SmartDel.com.

If you receive error message then:

- 1. make sure you are connected on the internet
- 2. If you have installed a firewall allow SmartDel Software to access the internet.

#### Offline Method

If you are not able to do data updation from within the SmartDel software then go to <u>www.SmartDel.com</u>  $\rightarrow$  Subscribers download  $\rightarrow$  Scroll to SmartDel updation files  $\rightarrow$  Right Click on the data file & click on Save Target As  $\rightarrow$  Save in SmartDel folder.

Now click on Data Updation  $\rightarrow$  click on ... button  $\rightarrow$  Select the NBDDMon.csv file [DD – Day, Mon – Month for e.g. NB01Jan.csv for Updation file of 1<sup>st</sup> Jan & click on process.

Data Updation should be done for every trading day, otherwise Query may not reflect the correct result.
